by Jean-Luc Moerman, local
graphic designer

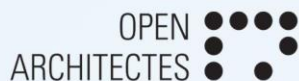

"Self-taught artist who has been drawing and painting since childhood. I try to keep my life energy intact through drawing. I have been drawing since I was a child, long before I communicated with others. I live for my art and have always followed my childhood dream. My work has been exhibited in various galleries, countries, museums, and international fairs. The foundation of my work is drawing, which is a form of writing without an alphabet. My source of inspiration and the path I follow is the life force present in all things. The invisible world that is passed down from generation to generation, all the forces that act in our existence, beyond all the conditioning and the individual prisms, long before the gods... Aren't we made of star dust cohabiting on a tiny planet in the middle of the cosmos... A little over two years ago, I created the Bicycleat non-profit organization, which distributes hot meals to the invisible people who survive on the streets. This is my way of not losing sight of the essential, just as when I draw."
